

at SETA Portsmouth 2010

November 7 - 9

Portsmouth Renaissance Hotel & Conference Center, Portsmouth, VA

The Transcript You Always Wanted

Are you frustrated with your standard transcript? With over 15 years of Banner experience, Evisions has developed a solution for all of your transcript needs. From simple format changes to advanced customizations, Evisions can give you the transcript you have always wanted without the hassle of customizations to Banner. This session will cover the different options you have with Evisions products and solutions. The Evisions solution offers delivery options from printing, imaging, and sending electronically. Come see how you can get your ideal transcript!

Argos Case Studies and Examples

Argos has helped hundreds of Banner sites solve reporting and information access challenges. This session will go through examples from Letter Generation and basic reporting to Data Cubes and Dashboards. Using client examples you will see how Argos can help you go beyond basic reporting and get access to the information you need.

Argos ODS/EDW Advancement Reporting

Evisions Argos, Enterprise Reporting Solution, is the proven application for rolling out reporting to all users on campus quickly and simply. Argos comes with over a hundred reports ready to use with the ODS as well as an active Higher Education user community to collaborate with on report development. With unlimited users, user types, and an easy-to-use environment everyone can answer questions fast! This session will show numerous clients utilizing Argos and the ODS/EDW in all stages of implementation.

Argos and Strategic Planning for Enrollment

Enrollment Management is vitally important to the college or university. If enrollment decreases dramatically or increases beyond campus capacity in one cycle it can be a distraction to campus. Enrollment Management dashboards and other reporting can assist in the decision process when managing enrollment. We will review dashboards and reports that our clients have created utilizing Argos along with sample reports that the Professional Services staff at Evisions have completed to assist clients in making strong Enrollment Management decisions.

Argos Charts and Graphs - Visualized Decision Making

Are the Executives at your institutions looking for graphical representations of data in order to make informed, data driven decisions? Then this is the session for you! We'll cover the basics of chart and graph development in Argos, including drillable charts on multiple forms, and charts of all types (gauges, bar charts, pie charts, line graphs, etc).

FormFusion Advanced Features

This FormFusion training session is intended for technical users that want to learn about the advanced uses of FormFusion. This session will cover off-set fields, non-standard Banner jobs, and using FormFusion with other applications.

IntelleCheck and Higher One - Electronic Refunds

Evisions and Higher One have an exclusive relationship for handling credit refunds using IntelleCheck. Learn how this integration can benefit your institution when handling student refunds. Both Evisions and Higher One staff will be available to discuss the process for setup and process flow. Learn more about how this partnership will lessen the refund efforts on your campus.

Argos Reporting with Events Management

Reed College has been using the Banner Events Management module for 3 years with middling results and acceptance by the end-users. Then, they used Argos to build some reports against the Events Management tables, and a whole new world of usability opened up for them! In this presentation, we will show the building and use of two fully functioning, in-use DataBlocks built from the Events Management module of Banner. Attached to the main DataBlock are banded reports and CSV reports including name tags, check in lists, giving information lists, email lists, mailing lists. The second DataBlock is a QuickView used to print quickly needed single name tags. With the creation of these two DataBlocks, end-users have begun to understand the importance and usefulness of the Events Management module and Reed has greatly increased its accuracy in day-to-day planning and running of events, post-event follow up, and affinity tracking.
